Optional consent: using my child's work to improve Acadence

Your child's tuition centre uses Acadence, software made by **BOOK IN CHAT PTE. LTD.** (UEN 202646792Z, "Acadence"). This form is **optional**. It does not affect your child's lessons, marking or results. For the uses below, Acadence (not the centre) is responsible for the data under the Personal Data Protection Act 2012.

1. Help improve Acadence

Acadence may use copies of my child's worksheet and practice work, the text an AI read from it, the AI's suggested marks and the tutors' corrections, with my child's name and account details removed, to test, train and improve Acadence's AI marking and learning materials. This may include training AI models that Acadence runs or that an AI service on Acadence's Provider list (acadence.net/legal/providers) runs for it. Copies are kept for at most 3 years. They are never sold. Some of these services are outside Singapore (for example in the United States), and their data-protection terms are written mainly for EU and US law; the list says where each one works.

[ ] I agree.

2. Promotion

Acadence may show my child's work (for example a marked page) in its videos, website, social media and presentations about Acadence. It will never show my child's name, face or school, and will remove anything on the page that identifies them.

[ ] I agree.

Changing your mind

You can withdraw either agreement at any time by telling the centre or writing to dpo@acadence.net. Acadence then stops the use and deletes its copies within 30 days. Material already published, or an AI model already trained, cannot always be taken back; Acadence will not use the work in anything new.

Version of this form: 2026-10-27.

I am the parent or legal guardian of the student named below.

Tuition centre: _____

Student's name: _____ Class: _____

Student's date of birth: _____ (so we know whether a parent must sign)

Parent or guardian's name: _____

Relationship: _____

Signature: _____

Date: _____

If the student is 18 or older, the student may sign instead.
